

16th April, 12

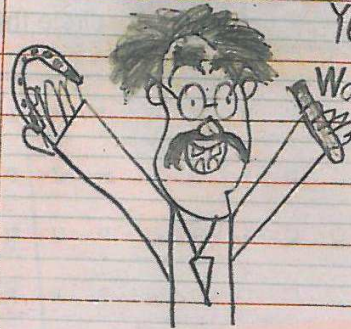

Dear ES Junior,

My name is Warrren, I study is PLK Lam Man Chan English Primary School, I am in class 4A. I am nine years old.

Today, I am going to tell you about my dream job is to be a scientist, I want to be like Albert Einstein. Do you know who is him? He invented a formula is $(E=mc^2)$, this means the speed of the light is the fastest of anything. I like to do experiments so I want to do this job.

I wish you like my sharing. Write back soon!

Yours,
Warren

Every day, ES Junior receives many letters from supportive readers like you. We now publish some of them online. Check them out at 'Readers' Mailbox' at www.esjunior.com.hk.

Hi Warren,

Thanks for writing to us and telling us that you want to be a scientist when you grow up. Of course I know Albert Einstein! He is one of the greatest scientists. I hope you can be as great as him!

To become a scientist, you have to read a lot of books on science. Do you like reading science books? I like doing experiments but I don't like reading books about science. I think that's why I could never become a scientist!

Write to us again soon.

Cheers,
ES Rachel
