### 3. Achievements and Reflection of Major Concerns

#### 3.1 Priority Task 1: Strengthen learning efficiency and teaching pedagogies

3.1.1 Through panel meetings and co planning meetings, panel heads in different subjects have discussed questioning skills with teachers and encourage teachers to ask higher-level questions during lesson. All higher-level type questions are written down in the module plans and lesson plans. In the NC Chinese lessons, EDB officers came to co-plan and discuss different level of questions for the school-based textbooks. Mathematics teachers invited a professor from university to share how to deliver topics on 'Time'. Some Chinese teachers joined a workshop to learn about learners' diversity and dealing with reading comprehension. This year, there are 106 students selected to fill in the questionnaire of Key Performance Measures (KPM). The school selected 164 parents to fill in the questionnaire and 144 questionnaires were returned. Questionnaires are given to 58 teachers and 51 questionnaires are returned. Therefore, there are 301 questionnaires in total and then we have these results. According to the Stakeholder Survey Report in the KPM, subject panel heads are able to monitor curriculum implementation of their own subject scoring 92.2%. Generally, graded worksheets are prepared by teachers to cater different learning levels in different subjects. In assessments, teachers infused different level questions in their comprehension to provide diversity of answers and critical thinking. Teachers often ask students different level of questions and scored 98% in the teacher questionnaire. In the student questionnaire, teachers often ask students thought-provoking questions in lessons and scored 94%. The teacher professional development activities organized by the school are of great help to teachers in performing our duties, scoring 86.3% in the teacher questionnaire.

3.1.2 The school timetables are mostly structured into "blocked lesson", allowing most subjects to have collaborative meeting during free lessons to create space for teachers to deal with other matters. Teacher handbook is regularly prepared and is amended every year depending on the variation of the situation of the education field. Mentorship scheme called 'Novice-pro' is held every year to help new teachers get used to the new working environment. According to the Stakeholder Survey Report, the subject panel / committee heads provided effective guidance to the development of their panel committee, scoring 92.1%. For English phonetics lessons, we invited Chinese University to develop English Phonetics curriculum. For NC Chinese, we invited the EDB officer to develop P.5 Chinese curriculum (NC Chinese). We have Teachers' manuals of different subjects for the subject teachers. Every subject has arranged the

collaborative meetings regularly with each level subject teachers. According to school KPM report, our teachers have higher perception of teaching than the median. We are keeping ourselves into a learning organization and sharing knowledges and concepts amongst us.

- 3.1.3 Paper setting guidelines are prepared for teachers to follow strictly on methods to set the paper. Teachers circulate the assessments and examination papers in order to make sure the level of difficulty is suitable for students. Post-assessment evaluation meeting is held for analyzing students' performance. According to the Stakeholder Survey Report, parents think their child is highly interested in learning and it is scoring 86.8%. Parents think their child takes the initiative to learn that is scoring 74.2%. Parents also think their child is confident in learning with the scoring of 89.6%. Student often review their learning based on their assessment / examination results and teachers comments on their performance in their assignments and in class with the scoring of 94.3%. The performance assessments methods adopted by subject panels effectively assess students' performance, scoring 94.1%.

### **Reflections**

- 3.1.4 The School reminds teachers to ask different levels of questions during lesson observation and co-planning meeting. Every lesson, teachers should set the objective of the lesson and make it complete it within the lesson according to the students' ability. Teachers can simulate deeper thoughts by asking follow up questions and avoid asking one single question to one student, which will allow student to have a more profound answers and track of thoughts. We should focus on students' feedback because students' feedback can affect the follow up questions. While teachers ask questions, teachers should carefully scaffold ones question to guide the students into having an introspective and having self-reflection that enhance students' overall understanding.
- 3.1.5 Teachers are advised to try co-teaching for teachers to be able to learn from each other. The school found School-based curriculum Development in Primary Schools organized by EDB to help design the curriculum in Mathematics and Non-Chinese to let students learn more effectively. Besides, mentorship scheme was a success as it helped blend the new teachers into the school's teaching environment.
- 3.1.6 Follow-up work should be done to students with lower grades in assessments and examination. We will recommend them to join the R&E classes to improve their future grades. Also, after the assessment/examination, the marks of each part were further analyzed to identify the strengths and limitation of students thus students are thoroughly evaluated and proper follow-up can be done. Students are really evaluated and can do the further follow-up.

### **3.2 Priority Task 2: Incorporate and utilize IT tools for self-regulated learning**

- 3.2.1 Teachers had the school-based workshop for the interactive white board and tablet. E-class workshop was held in the beginning of the academic year. Some subjects have completely utilized tablets and e-class for teaching. Teachers have prepared pre-tasks like going to websites before attending lessons so they can have a better general idea on the topic. Some subjects started using e-worksheets to provide a dynamic method of learning. A multiplication competition by using tablets in Maths (3 different levels of paper); GS used tablets in GS STEM day; Chinese, Maths and English have online learning platforms for students to do at home. According to the Stakeholder Survey Report, teacher often teach students learning strategies such as doing pre-lesson preparation, using concept maps and online resources, etc. which got the score of 92.2%.
- 3.2.2 The three main subjects (Chinese has 「每日一篇」, English has 'i-learner' and Mathematics has 'Planetii') have extra platforms to arouse students' self-regulated learning. We have incorporated self-regulated learning in collaborate meeting and homework like researching on the internet is set to provide opportunity for self-regulated learning. According to the Stakeholder Survey Report, 94.3% students are able to apply learning strategies such as doing pre-lesson preparation using concept maps, tool books and online resources etc. Also, 95.3% students often read materials such as leisure materials and newspaper outside class.

### **Reflections**

- 3.2.3 We can encourage teachers to form a learning community to let teachers discuss how to use whitetboard among themselves. In the co-planning meeting, teachers are encouraged to use tablets to facilitate students' learning. E-worksheet is also recommended and students do it at home. Therefore, teachers can incorporate more IT elements in their lessons.
- 3.2.4 We try to regulate the self-regulated learning in homework policy to make it as a habit. We encourage students to do their own research and complete learning journals to incorporate more self-regulated learning. Also, finding information in the Internet or library are encouraged as pre-task of a new chapter.

### **3.3 Priority Task 3: Sustain healthy, caring and eco-friendly campuses**

- 3.3.1 Different kinds of talks and Smart-kids competition are regularly held at school. The atmosphere with high spirit is shown and students are very much involved. Project learning and practical assessment are both integrated into General Studies subject. The scheme of “Food For Good” is organized to encourage students not to waste food. According to the Stakeholder Survey Report, 97.3% of parents think that their child likes his or her school. 98.1% students like their school. 92.1% staffs are on harmonious term and cooperate with one another happily. In APASO, 99.1% students keep a healthy lifestyle.
- 3.3.2 Caring angel and community services are held throughout the year for the students and parents. According to the Stakeholder Survey Report, the teachers and students have a good relationship with scoring 100% from the teacher questionnaire. The teachers care about the student with scoring 98.1% in the student questionnaire. 98.1% students get along well with their schoolmates, and think that teachers care about them. 92.4% parents think that the teachers care about their child.
- 3.3.3 Every class, a student is chosen to be the “green captain” to monitor and regulate the electrical appliances to save energy in class. Teachers collect used paper in the staff room for recycling purposes. Eco-friendly concepts are a constant reminder to students and these concepts are also mentioned during the morning assembly. In Drama Festival, the school Drama Team took part in and the story was based on eco-friendly concepts. The drama was performed for over 5 times to students, parents and guests. It can spread out the eco-friendly concepts to others.

### **Reflections**

- 3.3.4 Snippets of newspaper can be cut and stuck onto the standing boards in the school hall to let students know more about the world news. We can encourage students to read their subscribed materials.
- 3.3.5 School may provide more varieties of community service for students help the community. Also, different kinds of duties can be created at school to provide more chances for students to take up their responsibilities.
- 3.3.6 Teachers can reinforce the eco-friendly concepts through different channels. The topic of eco-friendly can be incorporated into the formal curriculum to build up students’ awareness.

## 4. Our Learning and Teaching

### 4.1 Percentage of lesson time for the Eight Key Learning Areas

Apart from regular lessons, we arrange different learning activities in lessons, at recesses, lunchtime and after-school. We have after-school tutorial classes, class teacher lessons, morning assemblies, Reading Lessons, Library Lessons and sports, art and music training courses.

## 5. Student Support

### 5.1 Student Moral Development

Our school puts emphasis on the moral development of students. Apart from the moral assemblies, leadership training camps, patrol teams and caring angels, lessons toward whole person development have organized to cultivate students' social and emotional development. Our school also has a reward system and discipline regulations to foster the morality of students called "Students Award Scheme". Furthermore, we also held the Parent Talks to help the kindergarten students' parents to have a full picture of a primary school.

### 5.2 Student Counseling Services

Our professional school social workers provide support to individual students together with educational psychologists and class teachers. Meanwhile, support will be provided to students especially with Special Educational Needs (SEN) after identification from educational psychologists such as "The Early Identification and Intervention of Learning Difficulties Programme for Primary One Pupils" (EII). Moreover, school social workers provide lessons in the Whole Person Development (WPD). Hence, small groups, activities and talks for students are held to facilitate their personal growth.
